Free software is provided (Windows10/11 64bit)

COURSE OVERVIEW

Implant dentistry is a prosthetically driven discipline with a surgical component. Practitioners must place implants ideally for best prosthetic outcomes using different types of surgical guides. Sometimes no such guides are used by experienced implantologists, but many would agree that the use of a surgical guide would be a more conservative and efficient approach to implant placement. In the era of rapidly advancing technologies in digital dentistry, guided implant surgeries are becoming more practical in everyday implant dentistry and can be utilized safely to yield more predictable and consistent results.

This course provides participants with fundamental knowledge of guided implant surgery. Attendees will learn how to design and fabricate their own surgical guides using different digital tools and resources. Through hands-on exercises, including live case planning, participants will gain practical skills to utilize guided surgical kits and plan implant placement with greater confidence and accuracy.

COURSE OBJECTIVES

- Learn basics about digital dentistry
- Learn how to obtain digital data to design surgical guides
- Learn designing implant surgical guide
- Learn how to fabricate surgical guides
- Get familiar with a guided surgical kit for implant placements
- Gain practical skills to utilize a sinus guide kit for sinus surgeries

1-On-1 Live Patient Surgery Under The Direct Supervision
Included Free Dentis Fixture And A Surgical Guide

Upon completion of this course, we are offering a unique 1-on-1 live patient surgery under the direct supervision of Dr. Steve Kim. This session will guide you through the complete process - from treatment planning to printing a surgical guide, and placing implants on your own patient, you will gain valuable hands-on experience.

- Date : June 27, 2026 & October 24, 2026
- Includes : FREE DENTIS Fixture and a surgical guide
- Fee : $500 per patient (up to 2 implants)
- 50% on the restorative parts from Hana Dental Lab

Seats are limited! Don't miss this chance to LEVEL UP your clinical skills!
