

# Regeneration: Bone Grafting

The most clinically applicable course for predictable bone grafting.

GDIA Advanced Course: Hands-on

Dr. Kevin Kim DDS, FGIA

## Course Descriptions

Guided bone regeneration (GBR) is a surgical technique used to regenerate bone in the areas of bone loss or where there is insufficient bone for an implant placement. This course is designed to provide participating doctors with a comprehensive understanding of the fundamentals of GBR including bone graft materials and membrane selection, as well as the different techniques for membrane fixation such as membrane tacks, sutures, and screws. The course will focus on membrane selection, including different types of membranes available and their properties as well as the factors that influence membrane selection. Participants will also learn about the different techniques for membrane fixations. This course will include hands-on sessions on pig jaws in which participants will have an opportunity to practice the techniques covered in the course.

## Course Info

**Date:** Feb. 21 (Friday) & 22 (Saturday)

**Course:** 8:30-Registration  
9:00 AM-5:00 PM - Lecture & Hands-on

\*Light pastries & coffee for breakfast and lunch are included.

**Location:** DENTIS NorCal Office  
4305 Hacienda Dr., Suite 100, Pleasanton, CA 94588

**Tuition:** \$1,200 (\$1,000 for Early Bird by 12/31)

## Dr. Kevin Kim, DDS. FGIA

Dr. Kevin Kim received his undergraduate degree in psychology from the University of California San Diego. He attended the University of Southern California to obtain his Doctorate of Dental Surgery.

Dr. Kim is a graduate of the Kois Center, has completed courses on advanced bone grafting at the Picos Institute, took a nine-month implant training program at the Misch International Implant Institute, trained in the use of Puros block allograft, completed implant training at The Zimmer Institute, and completed an IV sedation course. All of the time he has spent learning new things and keeping up to date on current technology directly influences the care he is able to give his patients.

# Regeneration: Bone Grafting

## Course Objectives

- Fundamental of GBR
- Graft materials and Membrane Selections
- PRF & Sticky bone applications
- Graft Immobilization
- Flap Designs depending on bone defects
- Flap Advancement. Tension free primary closure with less morbidity
- Vertical Augmentation
- Advanced membrane fixations
- How to suture different graft sites
- How to manage graft complications

*You can also enroll @GDIA Website!*

## Hands-on session

- How to make PRF
- How to make sticky bone
- Membrane fixations
- Pig jaw model surgery
- How to use "SAVE WIDE GAP (Dentis Product)" (Minor ~ intermediate GBR)
